

D

Cut-offs are derived by the mid-gap rule

cut-off = midpoint between the highest bias value and the lowest TF value; margin = half the gap

assay	V-channel width	Inside-V enrichment	rule
loMNase	6.71	0.51	100%
DNase	9.15	0.34	100%
ATAC	20.00	0.37	100%
